Hi Faye,

Attached are all the historical stuff I found on the web or acquired from ODOT.

This has a bathymetric map and temperature profile of Lindsey Lake from 1974 (page 20) -  
<https://pubs.usgs.gov/unnumbered/70199341/report.pdf>

Here is additional information about historical Lindsey Pond (reference the attached 1920 map), which may have some inaccurate information -  
<https://sites.google.com/site/recreatingthehcrh/historic-columbia-river-highway/lindsey-creek-to-starvation-creek/drowned-lindsey-lake>

All this has led me to believe there is alluvium sitting at the base of the constructed roadway, (particularly underneath the impact slope). Mike Zimmerman at ODOT also believes the same. It's only a guess, of course.

I unsuccessfully tried recreating the (attached) Wygant photos at the spill site in Google Earth and became convinced they probably depict an area to the east somewhere closer to Wygant State Park (I didn't take the time to confirm this).

Let me know if you need anything else –

Charles

Charles,

Could you send me the historical photo showing the gas station down by Lindsey Creek?

Faye Walstead
